Project Objectives

Date	10 October 2022
Team ID	PNT2022TMID08862
Project Name	Car Resale value Prediction

The main objectives of the project is to predict of the price of resale/second hand cars by using the various machine learning (ML) model. The customers is to make to decision which is based on different queries or factors like..

- Name of the car i.e. Hyundai, Audi…
- On the brand of car with specific names i.e. creta, s5..
- Select the year to be purchased.
- Types of the fuel i.e. petrol, diesel..
- To predict the price..
- To drive number of kilometers driven.

Objectives:

- To understand the problem and to classify if it is a regression or classification problem.
- To able to understand how to pre-process and clean the dataset using different techniques.
- To understand how to calculate and valuate the model.
- To build the specific price of the resale value of the car using flask framework.
